Keeping You **Safe**

Trees play an important role in our environment and are a valuable asset to your property. But, if they are too close to power lines, they can be a danger.

You will be notified in advance of planned tree trimming. An informational packet explaining our process will be left at your address. If removal is recommended, your packet will include information to contact the utility arborist evaluating your trees.

Only professional arborists and nationally recognized, insured and properly certified contractors perform tree trimming and removal for us. Tree crews work year-round to provide you with **SAFE** and **RELIABLE** service with the least amount of inconvenience.

For more information,
visit **NIPSCO.com/Trees**

Questions or concerns,
call **1-800-4-NIPSCO**

! IF A LIMB OR TREE
KNOCKS DOWN A
A POWER LINE
