

## WHEN BRANCHES SWAY POWER OUTAGES AREN'T FAR AWAY

Trees coming into contact with electric lines are one of the leading causes of power outages. Even one tree coming in contact with main distribution power lines could result in loss of electricity to hundreds of customers.

## Keeping You Safe

Trees play an important role in our environment and are a valuable asset to your property. However, if they are too close to power lines, they can be a danger.

You will be notified in advance of planned tree trimming. An informational packet explaining our process will be left at your address. If removal is recommended, your packet will include information to contact the utility arborist evaluating your trees.

Only professional arborists and nationally recognized, insured and properly certified contractors perform tree trimming and removal for us. Tree crews work year-round to provide you with **SAFE** and **RELIABLE** service with the least amount of inconvenience.
