

**ADDENDUM TO NOTICE OF INTENT AND  
CERTIFICATION TO COMPLY WITH ALTERNATIVE CLOSURE REQUIREMENTS  
of 40 C.F.R. 257.103(b)**

**R.M. Schahfer Generating Station**

NIPSCO provided a timely notice of intent and certification to comply with the alternative closure requirements of 40 C.F.R. 257.103(b) on or about February 15, 2019 for three CCR units at the R.M. Schahfer Generating Station ("Notice"). Pursuant to the Notice, NIPSCO intended to avail itself of the alternative closure requirements set forth in 40 CFR 257.103(b) for the following units: (1) the Material Storage Runoff Basin (MSRB); (2) the Metals Cleaning Waste Basin (MCWB), and (3) the Waste Disposal Area (WDA). NIPSCO now intends to proceed under the alternative closure requirements only for the WDA.

While NIPSCO originally intended to avail itself of the alternative closure requirements in 40 C.F.R. § 257.103(b) and (c), for all three units, NIPSCO completed the work necessary to initiate closure of the MSRB and MCWB by October 31, 2020, in accordance with 40 CFR § 257.101(a)(1). Thus, NIPSCO will not seek to avail itself of the Section 103(b) and (c) requirements for the MSRB and MCWB units.

Accordingly, the Notice applies only to the WDA.
