Rate Formula Template Page 5 of 5 For the 12 months ended 12/31/25 Formula Rate - Non-Levelized Utilizing FERC Form 1 Data

Northern Indiana Public Service Company LLC

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#)

Note References to data from FERC Form 1 are indicated as: #.v.x (page, line, column) Letter

Peak as would be reported on page 401b, column d of Form 1 at the time of the applicable pricing zone coincident monthly peaks.

- A B Labeled LF, LU, IF, IU on pages 310-311 of Form 1at the time of the applicable pricing zone coincident monthly peaks.
- Labeled LF on page 328 of Form 1 at the time of the applicable pricing zone coincident monthly peaks.
- Labeled LF on page 328 of Form 1 at the time of the applicable pricing zone coincident monthly peaks.
- The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff.

 The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to ASC 740. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against operating income as discussed in Note K. Account 281 is not allocated. The calculation of ADIT by prior now inroughs and exchange it are during chose to during an accordance of the annual projection and Annual True-Up calculations will be performed in accordance with Treasury regulation Section 1.167(I)-1(h)(6). Differences attributable to over-projection of ADIT in the annual projection will result in a proportionate reversal of the projected prorated ADIT activity to the extent of the over-projection. Differences attributable to under-projection of ADIT in the annual projection will result in an adjustment to the projected prorated ADIT activity by the difference between the projected monthly activity and the actual monthly activity. However, when projected monthly ADIT activity is an increase and actual monthly ADIT activity is a decrease, actual monthly ADIT activity will be used. Likewise, when projected monthly ADIT activity is a decrease and actual monthly ADIT activity is an increase, actual monthly ADIT activity will be used. Work papers supporting the ADIT calculations will be posted with each Annual True-Up and or Projected Net Revenue Requirement and included in the annual Informational Filing submitted to the Commission. The Annual True-Up or Projected Net Revenue Requirement ADIT worksheets set forth the calculation pursuant to-Treasury regulation Section 1.167(l)-1(h)(6). Beginning with the 2020 rate year, the Annual True-Up for a given year will use the same methodology that was used to project that year's rates.
- Identified in Form 1 as being only transmission related balances. The transmission portion of page 227, line 5 is specified in a footnote to the Form 1.

 Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5. Prepayments are the electric related prepayments booked to Account No. 165 and reported on Page 111, line 57 in the Form 1.
- Line 5 EPRI Annual Membership Dues listed in Form 1 at 353.f, all Regulatory Commission Expenses itemized at 351.h, and non-safety related advertising included in Account 930.1. Line 5a -Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351.h.
- Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.
- The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) (page 3, line 26).

Inputs Required:	FIT =	21.00%	
	SIT=	4.90%	(State Income Tax Rate or Composite SIT)
	p =	0.00%	(percent of federal income tax deductible for state purposes)

- Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and 561.BA.
- М Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until Form 1 balances are adjusted to reflect application of seven-factor test).
- N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down
- NIPSCO is a combined gas and electric company and does have common plant assets. As all common plant balances and related depreciation expenses are allocated to either gas or electric plant on page(s) 356 of FERC Form 1 using ratios approved by the state jurisdiction, NIPSCO has not included a balance for gas assets in lines 5 and 11 of page 2 nor gas expenses in lines 6 and 11 of page 0 3. Therefore, there is no need to populate line 18 on page 4 as the gas plant balances and expenses have been eliminated from amounts reported in this Attachment 0.
- Debt cost rate = long-term interest (line 21) / long term debt (line 27). Preferred cost rate = preferred dividends (line 22) / preferred outstanding (line 28). The allowed base ROE of 10.02% was established in Opinion No. 569-B and no change in the base ROE may be made absent a filing with FERC. A 50 basis point adder for RTO participation may be added to the base ROE up to the upper end of the zone of reasonableness of 12.62% as established by FERC.
- 0 Line 33 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor.
- Includes income related only to transmission facilities, such as pole attachments, rentals and special use.
- Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking the revenues are included in line 4, page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have not been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.
- The revenues credited on page 1, lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Т Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.
- Account 456.1 entry shall be the annual total of the quarterly values reported at Form 1, 330.x.n.
- Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements.
- W Pursuant to Attachment GG of the MISO Tariff, removes dollar amount of revenue requirements calculated pursuant to Attachment GG.
- Removes from revenue credits revenues that are distributed pursuant to Schedules associated with Attachment GG of the MISO Tariff, since the Transmission Owner's Attachment O revenue X requirements have already been reduced by the Attachment GG revenue requirements.
- v Page 2, line 23a includes any unamortized balances related to the recovery of abandoned plant costs approved by FERC. Page 3, line 9a includes the Amortization expense of abandonment plant costs approved by FERC. These are shown in the workpapers required pursuant to the Annual Rate Calculation and True-Up Procedures
- Calculate using 13 month average balance, reconciling to FERC Form No. 1 by page, line and column as shown in Column 2.
- For items not subject to proration under Note F, calculate using a simple average of beginning of year and end of year balances reconciling to FERC Form No. 1 by page, line and column as shown AA in Column 2
- Calculation of Prior Year Divisor True-Un: BB

Historic Year Actual Divisor Pg 1, Line 15 2,668,584 Projected Year Divisor 2,665,916 Difference between Historic & Project Yr Divisor 2.668 57.26800 Prior Year Projected Annual Cost (\$ per kw per yr.) Pg 1, Line 16 Projected Year Divisor True-up (Difference * Prior Year Projected Annual Cost) (152 791)

- CCPursuant to Attachment MM of the MISO Tariff, removes dollar amount of revenue requirements calculated pursuant to Attachment MM.
- Removes from revenue credits revenues that are distributed pursuant to Schedules associated with Attachment MM of the MISO Tariff, since the Transmission Owner's Attachment O revenue DD requirements have already been reduced by the Attachment MM revenue requirements.
- FF Schedule 10-FERC charges should not be included in O&M recovered under this Attachment O.
- FF Stores Expense Undistributed (Account 163) will be the average of the beginning of the year and the end of year balances, multiplied by the "Ratio O&M" percentage for electric, as reported on page(s) 356 of the Form 1, multiplied by the Net Plant (NP) Allocator, as calculated on page 2, line 18, column 4 of this Attachment O.
- Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC.
- Includes the amortization of any excess/deficient deferred income taxes resulting from changes to income tax laws, income tax rates (including changes in apportionment) and other actions taken by HH a taxing authority. Excess and deficient deferred income taxes will reduce or increase tax expense by the amount of the excess or deficiency multiplied by (1/(1-T)) (page 3, line 26a).
- П Includes the annual income tax cost or benefits due to permanent differences or differences between the amount of expenses or revenues recognized in one period for ratemaking purposes and the amounts recognized for income tax purposes which do not reverse in one or more other periods, including the cost of income taxes on the Allowance for Other Funds Used During Construction. T multiplied by the amount of permanent differences and depreciation expense associated with Allowance for Other Funds Used During Construction is included in page 3, line 24b and will increase or decrease tax expense by the amount of the expense or benefit included on line 24b multiplied by (1/(1-T)) (page 3, line 26b).
- Includes Account 456 Other Electric Revenues related only to transmission facilities or recovery of transmission O&M, such as Schedule 50.

NOTES

- 1) Column J is the difference between projected monthly and actual monthly activity (Column I minus Column F). Specifically, if projected and actual activity are both positive, a negative in Column J represents over-projection (amount of projected activity that did not occur) and a positive in Column J represents under-projection (excess of actual activity over projected activity). If projected and actual activity are both negative, a negative in Column J represents under-projection (excess of actual activity) and a positive in Column J represents over-projection (amount of projected activity that did not occur).
- 2) Column K preserves proration when actual monthly and projected monthly activity are either both increases or decreases. Specifically, if Column J is over-projected, enter Column G x [Column F]. If Column F]. If Column J is under-projected, enter the amount from Column G and complete Column L). In other situations, enter zero.
- 3) Column L applies when (1) Column J is under-projected AND (2) actual monthly and projected monthly activity are either both increases or decreases. Enter the amount from Column J. In other situations, enter zero.
- 4) Column M applies when (1) projected monthly activity is an increase while actual monthly activity is a decrease OR (2) projected monthly activity is a decrease while actual monthly activity is an increase. Enter actual monthly activity (Col I). In other situations, enter zero.
- 5) Column N is computed by adding the prorated monthly activity, if any, from Column K to 50 percent of the portion of monthly activity, if any, from Column L or M to the balance at the end of the prior month. The activity in columns L and M is multiplied by 50 percent to reflect averaging of rate base to the extent that the proration requirement has not been applied to a portion of the monthly activity.
- 6) For the non-property-related component of the balance, the Average Balance is computed using the average of beginning of year and end of year balance. For the property-related component of the balance, the Average Balance is computed as described in Note 5.

Rate Base Adjustment for FAS 109 Regulatory Assets/(Liabilities) Table Instructions

The purpose of the table 'Rate Base Adjustment for FAS 109 Regulatory Assets/(Liabilities)' on this worksheet is to show-any adjustments for ratemaking for the applicable rate year. In order to tie to inputs used in formula rate tariff, note that this table may include more information than the Excess/Deficient ADIT information required by FERC in Order No. 864.

Add company-specific FERC Form No. 1 information or references
These deferred tax account balances can also be found in the FERC Form No. 1 references or the footnotes therein.
Account No. 190 - FERC Form No. 1 Page 234, line 8, column c

Account No. 281 - FERC Form No. 1 Page 273, line 8, column k Account No. 282 - FERC Form No. 1 Page 275, line 2, column k Account No. 283 - FERC Form No. 1 Page 277, line 9, column k

Add company-specific information related to how balances are used for adjustments to rate base.

Footnote A
Rate base adjustments can be found on the "ADIT Balance Worksheet" tab within the ending balance line for the above-referenced rate year.

Both the protected and unprotected portions for each amortization method/period need to be added together for each separate account (i.e., 190, 281, 282 and 283) to calculate the rate base adjustment for that account. The following table shows the columns associated with each account.

Acc	ount Columns
190	A and B
281	N/A
282	E, F and G
283	H and I

(Excess)/Deficient Amortization Entry Table Instructions

The purpose of the '(Excess)/Deficient Amortization Entry' table of this worksheet is to show the (excess)/deficient amortization entries to Accounts 410.1 and 411.1 by deferred tax account.

The total (excess)/deficient amortization is the input for the formula rate template on Enter company-specific reference

Footnote B
The (Excess)/Deficient Amortization booked to Account 410.1 can be found on the "ADIT Balance Worksheet" tab within the "Amortization of Excess/Deficient ADIT" line in the section for the above-referenced rate year.

Both the protected and unprotected portions for each amortization method/period need to be added together for each separate account (i.e., 190, 281, 282 and 283) to calculate the total amortization for that account. If the total calculated amortization for an account is positive, then the (Excess)/Deficient Amortization is booked to Account 410.1.

Please see Footnote A above for the columns associated with each account.

Footnote C
The (Excess)/Deficient Amortization booked to Account 41.1.1 can be found on the "ADIT Balance Worksheet" tab within the "Amortization of Excess/Deficient ADIT" line in the section for the above-referenced rate year.

Both the protected and unprotected portions for each amortization method/period need to be added together for each separate account (i.e., 190, 281, 282 and 283) to calculate the total amortization for that account. If the total calculated amortization for an account is negative, then the (Excess)/Deficient Amortization is booked to Account 411.1.

Please see Footnote A above for the columns associated with each account

The first populated version of the ADIT Salance Worksheet to be included in the tariff will be populated starting with balances as of 12/31/16. Subsequent versions will at a minimum show the prior year and current year balances. Rows or columns may be added into the table above for new items as needed.

The Task Radic Taske Reneasurement lies in it wis workbeer are populated with amounts from the respective tax remeasurement table.

Where applicable add footnotes to explain amortization methods, periods, etc.

Footnote A

Use 2 of the ADIT Worksheet lists the amortization method associated with protected excess/deficient deferred income taxes resulting from changes to income tax laws, income tax rates and other actions taken by a taxing authority.

Use 3 of the ADIT Worksheet lists the amortization period for excess/deficient deferred income taxes resulting from changes to income tax laws, income tax rates (including changes in apportionments) and other actions taken by a taxing authority.

Section 2.6.

Se

Footnote C
The Indians General Assembly has made a few changes to the Adjusted Gross Income tax rates over the past several years, as follows: 2001: Periodic decrease in rate from 4.5% to 5.5% to 5.5% by 2022 2011: Periodic decrease in rate from 5.5% to 5.5% by 2022 2012: Periodic decrease in rate from 5.5% to 4.5% by 2022 2014: Periodic decrease in rate from 5.5% to 4.5% by 2022 2014: Periodic decrease in rate from 5.5% to 4.5% by 2022 2014: Periodic decrease in rate from 5.5% to 4.5% by 2022 2014: Periodic decrease in rate from 5.5% to 4.5% by 2022 2014: Periodic decrease in rate from 5.5% to 4.5% by 2022 2014: Periodic decrease in rate from 5.5% to 4.5% by 2022 2014: Periodic decrease in rate from 5.5% to 4.5% by 2022 2014: Periodic decrease in rate from 5.5% to 5.5% by 2022 2014: Periodic decrease in rate from 5.5% to 5.5% by 2022 2014: Periodic decrease in rate from 5.5% to 5.5% by 2022 2014: Periodic decrease in rate from 5.5% to 5.5% by 2022 2014: Periodic decrease in rate from 5.5% to 5.5% by 2022 2014: Periodic decrease in rate from 5.5% to 5.5% by 2022 2014: Periodic decrease in rate from 5.5% to 5.5% by 2022 2014: Periodic decrease in rate from 5.5% to 5.5% by 2022 2014: Periodic decrease in rate from 5.5% to 5.5% by 2022 2014: Periodic decrease in rate from 5.5% to 5.5% by 2022 2014: Periodic decrease in rate from 5.5% to 5.5% by 2022 2014: Periodic decrease in rate from 5.5% to 5.5% by 2022 2014: Periodic decrease in rate from 5.5% by 2022 2014: Periodic decrease in rate from 5.5% by 2022 2014: Periodic decrease in rate from 5.5% by 2022 2014: Periodic decrease in rate from 5.5% by 2022 2014: Periodic decrease in rate from 5.5% by 2022 2014: Periodic decrease in rate from 5.5% by 2022 2014: Periodic decrease in rate from 5.5% by 2022 2014: Periodic decrease in rate from 5.5% by 2022 2014: Periodic decrease in rate from 5.5% by 2022 2014: Periodic decrease in rate from 5.5% by 2022 2014: Periodic decrease in rate from 5.5% by 2022 2014: Periodic decrease in rate from 5.5% by 2022 2014: Periodic decr

The 2014 decrease in the Adjusted Gross Income tax rate will be phased in over 7 years. The tax rate decreases each year on July 1. The deferred tax requirement changed in 2011 when the rate decreased to 6.5% and again in 2014 when the rate was reduced from 6.5% to 4.9%. These combined decreases in the tax rate resulted in excess state deferred taxes.

Similar to the federal excess and deficiency, recovery of state income taxes occurs over the regulatory life of the assets.

Each subsequent tax rate change will add remeasurement tabs as needed
Remeasurement tabs may be removed once the period containing the tax rate change is no longer shown on the ADIT Balance Worksheet

Footnote A

GAPA Accounting Standards Codification (ASC) 740 requires recognition of the effect of a change in tax law or rate in the period that includes the enactment date. As a result of the enactment of Tax Cuts and lobs Act ("TCAP") in 2017, NIPSCO re-measured its accumulated deferred income tax (AOT) balances as of December 31, 2017 from 35% to the Federal income tax rate of 21% effective Jeanuary 1, 2018. Then et excess AOT represents the difference between the 35% and 21% Federal mome tax rate which was recorded as a regularly niability (grossed-up for taxed) in Account 254 to be returned to customers over the remaining lies of the assets based upon the normalization provisions of the Internal Revenue Coef (RIC) and Public Law Section 13001(g) of the TCLA that includes accompanying but uncodified normalization requirements related to the reduction of the corporate tax rate.

Ecotocie B.

The Other (Non-plant related) balances recorded in Account 199 primarily represent future deductible book/tax temporary differences primarily related to post retirement benefits, accrued enployee compensation, accrued property tax and customer advances for construction
Other (Non-plant related) balances recorded in Account 283 primarily represent future taxable book/tax temporary differences primarily related to regulatory assets.

Footnote A
The Indiana state income tax rate was gradually reduced from 8.5% effective June 30, 2012 to 4.9% effective July 1, 2021.

NIPSCO re-measured its ADIT balances to 4.9% resulting in net excess ADIT that was recorded as a regulatoy liability (grossed-up for taxes) in Account 254 to be returned to customers over the remaining lives of the assets.
