## Section 358.5(c)(4) – Written Log of Waivers

NIPSCO assigned functional control of its transmission facilities to the Midwest Independent Transmission System Operator, Inc. ("Midwest ISO") effective October 1, 2003. NIPSCO also cancelled those provisions of its OATT, including the rate schedules, governing the provision of transmission service effective October 1, 2003. NIPSCO has a currently effective OATT under the Midwest ISO that sets forth the rates and terms and conditions governing NIPSCO's provision of ancillary services.

NIPSCO will maintain a written log of the circumstances and manner in which it exercises any discretion permitted by the remaining provisions of its OATT under the Midwest ISO. The information in this log will be posted on this webpage within 24 hours of NIPSCO's exercise of such discretion.
