

## Prospective 2020 PRODUCT CONTENT LABEL<sup>1</sup>

The Green Power Program (Rider 786) matches the percentage of your electricity usage selected at enrollment. The Green Power Rider will be made up of the following renewable resources averaged annually.

Current Product Content January 1 to December 31, 2020

<b>Green-e<sup>®</sup> Energy Certified New<sup>2</sup> Renewables in NIPSCO Green Power Program (Rider 786)</b>	<b>Generation Location</b>
Wind	100%
Total Green-e <sup>®</sup> Energy Certified New Renewables	100%
<b>Total</b>	<b>100%</b>

1. These figures reflect the renewable energy credits power source of generation that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you by August 1<sup>st</sup>, the actual resource mix of the electricity renewable energy credits you purchased during the preceding year.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years or less.

NIPSCO electric customers may designate 25, 50 or 100 percent of your monthly electric usage to be attributable to power generated by renewable energy sources. Commercial and industrial customers only have the added flexibility to designate five or ten percent of their monthly usage. You may change your participation level or cancel at any time at any time at no added cost.

For comparison, the current average mix of resources supplying NIPSCO includes: Coal (72.0%), Natural Gas (25.0%), Wind (3.7%) and Hydroelectric (0.3%). Source: NIPSCO 2018 IRP - Total Resource Summary. As testified in IURC Cause No. 45159, final order issued 12/04/2019, the typical NIPSCO residential customer uses 700 kWh per month on average.

For specific information about this electricity product, please contact NIPSCO, 1-800-464-7726, [www.nipsco.com](http://www.nipsco.com), or [cnb@nisource.com](mailto:cnb@nisource.com).

Green Power Rider (Rider 786) is Green-e<sup>®</sup> Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at [www.green-e.org](http://www.green-e.org).

Green Power is a Renewable Energy Certificate (REC) product and does not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information, see [www.green-e.org/rec](http://www.green-e.org/rec).

## Historical 2019 PRODUCT CONTENT LABEL<sup>1</sup>
