

Prospective 2026 PRODUCT CONTENT LABEL ¹

The Green Power Program (Rider 686) matches the percentage of your electricity usage selected at enrollment. The Green Power Rider will be made up of the following renewable resources averaged annually. Current Product Content January 1 to December 31, 2026.

Green-e® Energy Certified New ² Renewables in NIPSCO's Green Power Program (Rider 686)		Generation Location
Solar / Wind	60% / 40%	Arkansas, Illinois, Indiana, Iowa, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Montana, North Dakota, South Dakota, Texas, or Wisconsin
Total Green-e® Energy Certified New Renewables	100%	

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased during the preceding year

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years or less. Generation from a facility approved as repowered is included in this product.

NIPSCO electric customers may designate 25%, 50%, or 100% of your monthly electric usage to be attributable to power generated by renewable energy sources. Business Accounts have the added flexibility to designate a 5% or 10% participation level. You may change your participation level or cancel at any time at no added cost. For comparison, the current average mix of resources supplying NIPSCO includes Coal (33.0%), Natural Gas (20.0%), Wind, Solar plus Storage and Hydroelectric Generation Units (47.0%). Source: NIPSCO 2024 IRP –NIPSCO Energy Mix issued December 9, 2024. The average home in the United States uses 876 kWh per month. Source: US EIA, 2024.

For specific information about this electricity product, please contact NIPSCO, 1-800-464-7726, www.nipSCO.com, or cnb@nisource.com.

Green Power Rider (Rider 686) is Green-e® Energy certified and meets the environmental and consumer protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at www.green-e.org. Green Power is a Renewable Energy Certificate (REC) product and does not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information, see www.green-e.org/rec.
